This is UNEVALUATED
Information

At 0730 on 22 October 1954, 1 MiG-15, 4 D-28, and 2 Li-2s were observed at Bad Voerslau airfield. A row of 14 lights along the landing strip, about 50 meters apart, was observed from the road leading to Richter-Kreuzhof. The row possibly consisted of more lights which could not be seen because of undulations of the ground.
